Ekaterina Druzhinskaia

Data and Automation Analyst

comfe2436@gmail.com · +7 985 110 01 75 · Telegram @dru_zh
druzhinskaia.github.io · GitHub · LinkedIn · Remote work · Available for business travel

I automate reporting and validation of data in Excel and 1C. I document requirements, test solutions, prepare user guides and train users.

SKILLS

Tools Excel · Power Query · VBA · 1C:BGU
Basic proficiency SQL · Python / pandas · Power BI
Methods Process analysis · Requirements · BPMN · AS-IS / TO-BE · RTM

EXPERIENCE

Data and AI Automation Analyst 09.2026 - present
Interregional Inspectorate for Debt Management, Federal Tax Service of Russia

I analyse data in 1C and information systems and reconcile exports, identify discrepancies and prepare analytical reports. I automate checks in Excel and use AI tools for selected work tasks.

Lead Analyst 12.2025 - 04.2026
Moscow Social Protection IT Centre (GAU ITC)

Managed an Excel reporting automation project for **120-140 organisations**: analysed the process, redesigned the reporting form, configured data quality checks and tested the solution. Prepared documentation, trained users and supported implementation.

Administrator · Druzhinskaia, Sole Proprietor 01.2022 - 02.2026

Maintained registers, documentation and reports, and checked data quality. Streamlined Excel operations and coordinated tasks and agreements.

Transfer Guide · Fit Holidays 05.2024 - 11.2024

Coordinated logistics, analysed customer feedback and recurring issues, and proposed service improvements.

Event Assistant · ARSK 09.2022 - 10.2022

Supported event organisation: coordinated permits, managed documentation and worked with teams. Recommendation letter.

PROJECTS

1C / Excel — Data quality checks: **326 records, an updating error register**. Duplicates, missing values, relationships, amounts, statuses and dates. Deliverables: Excel report, error register and remediation plan.

BPMN / 1C — Request processing automation: AS-IS / TO-BE, requirements, RTM, form mockup, specification, acceptance criteria and test scenarios.

Python / BI — Sales and customer feedback: data cleaning, 1–5 ratings, weighted margin, priorities and a reproducible pipeline.

SQL / BI — Model with **5 tables and 1,660 orders**: SQLite, JOIN, CTE and a BI prototype with revenue, margin and accounts receivable KPIs.

Projects use the author’s own data and source tasks. Implementation and limitations are documented in the repositories.

EDUCATION

Master's degree · Business Informatics 2025 - 2028
Specialisation: Information Business Analytics
Moscow University of Finance and Law (MFUA), Moscow

Bachelor's degree 2021 - 2025
Plekhanov Russian University of Economics

Course: Algorithm and Application Development.
Certificate, 2026: Personnel Records in UAIS Budget Accounting (1C). Role: HR clerk. Valid for 3 years.
